SELF-HEATING FACE MASKS USER GUIDE

Spa du Visage

The *Spa du Visage* self-warming mask is a real care and relaxation duo for your face. It will offer you a moment of deep relaxation, as if you were at the Spa, for a rested and luminous skin...
The skin of the face is particularly sensitive, which is why specific care is needed.

The mask is very easy to use. No need for a microwave, it heats itself as soon as it comes into contact with the air. The pack contains 10 sachets with a single-use self-heating mask.

PRINCIPLE

The *Spa du Visage* mask heats up as soon as the bag is opened due to the contact with the air. This is the result of a reaction of oxidation of a little iron powder, which is totally natural.

In contact with the air, the activated carbon contained in the mask will heat up naturally, generating water vapor. Gently diffused over your eyes, it will be beneficial for your skin and your wellbeing.

For your skin care, the heat will open the pores, deep cleaning and a better efficiency of the skincare applied afterwards. It will activate the microcirculation (bags and dark circles) and relax tired features.

The heat will act on your wellbeing and relieves your tensions. It soothes and allows you to relax and forget the stress of the day, thus promoting sleep.

BENEFITS

Your skin is subject to external and internal aggressions. Indeed, the sun, pollution, wind, temperature differences can damage your skin. But don't forget: stress, lack of sleep and fatigue are also responsible for premature skin ageing.

It is therefore important to be able to take care of your skin but also your wellbeing which is systematically reflected on your skin.

The mask pattern may change depending on the production run.

USE

The *Spa du Visage* self-heating mask is very easy to use. No need to heat it, just take it out of its bag and the mask heats itself.

- Make sure your skin is perfectly cleansed and makeup-free.
- Take the mask out of its bag and unfold it.
- Apply it immediately using the elastics at the ears. The mask must be used as soon as you take it out of the bag.
- You can remove the pre-cut fabric from the eyes, nose and mouth. However, it is advisable to keep them on to limit heat loss.
- The water vapor will start to diffuse and the heat will gradually intensify (for about 2 minutes) and then stabilize at 41°C.
- Leave the mask on for 20-30 minutes.
- Keep your eyes closed during use.
- After 30 minutes (or maximum 1 hour), remove the mask and discard it (the masks are for single use only)
- Rinse your skin and apply your usual skin care cream.

- Improved skin texture: smooth and soft skin
- Deep skin cleaning: easier removal of blackheads
- Detoxification: the steam and the opening of the pores release the impurities
- Better efficiency of the care products applied afterwards and therefore better hydration of the skin
- Micro-circulation: luminous and rested skin, repair of the epidermis
- Less tired features, reduction of dark circles
- Relaxation and stress relief
- Relaxation of facial muscles
- Preparation for sleep
